Advice on Template [2026] for personal data breach notification
Version 1.0 Adopted on 08 June 2026

1. **26. Accuracy & Responsibility** : Checkbox: Information on the liability for the accuracy of the information provided (can be combined with Art. 13 information)

I do not understand what this filed means.

2. **125 Please identify the attachments to this notification**

Question/field 125 should be optional, absence of reply/uopload of document should not prevent from closing the notification.

3. **4.4 Measures taken (or proposed to be taken) to prevent similar personal data breach**

This question/field seems to go beyond article 33 of GDPR.

4. **Questions/fieds in the template asking "further description" or "further comments"**

Each question/fie in the template should be optional, absence of reply should not prevent from closing the notification.

5. General comment : this template increases the notification obligation with additional questions and seems to me to be contrary to the necessity to lighten the bureaucratic burden for businesses, administrations and associations in the EU, in contradiction with the spirit of "Omnibus".
