

Report on the application of the LED under Article 62 LED

Questions to Data Protection Authorities/the European Data Protection Board (2025)

Fields marked with * are mandatory.

Background

The Data Protection Law Enforcement Directive (LED)[1] applies to domestic and cross-border processing of personal data by competent authorities for the purposes of preventing, investigating, detecting or prosecuting criminal offences and executing criminal penalties, including safeguarding against and preventing threats to public security. The LED takes a comprehensive approach to data protection in the field of law enforcement, including by regulating 'domestic' processing.

In 2022, the European Data Protection Board provided a consolidated contribution[2] of the individual replies of the DPAs to the questionnaire circulated in preparation of the 2022 Commission's first report. Following the Commission's presentation to the European Parliament and to the Council of the first report on the evaluation and review of the Directive in 2022[3], it is required to present a report every four years thereafter[4]. The Commission will present the second report in May 2026. Following the review the Commission shall, if necessary, submit appropriate proposals for amendments, in particular taking account of developments in information technology and in the light of the state of progress in the information society[5].

The LED stipulates that the Commission shall take into account the positions and findings of the European Parliament, of the Council and of other relevant bodies or sources[6]. The Commission may also request information from Member States and supervisory authorities. The Commission intends to consult Member States through the Council Working party on Data Protection. The European Union Agency for Fundamental Rights (FRA), is also conducting research based on interviews with competent authorities/prosecutors and Data Protection Authorities on the practical implementation of the LED.

For the purpose of the evaluation and review of the Directive, the Commission shall in particular examine the application and functioning of the LED provisions on international data transfers[7]. This questionnaire also

seeks to cover other aspects with particular relevance for the supervisory authorities, such as the exercise of their tasks and powers and their cooperation with each other, as well as the consistent application of the LED in the EU.

As this questionnaire intends to contribute to evaluating the LED, in your replies please provide information which falls under the scope of the LED. The reporting period covers the period from January 2022 to the 31 of August 2025. Please note that the European Commission intends to send out a version of this questionnaire on a yearly basis. Future versions will be aligned to the extent possible to the annual questionnaire on the GDPR.

The Commission would be grateful to receive the **individual replies to this questionnaire in its online form in English**, and the EDPB contribution to the LED review by 16 January 2026. In order for the EDPB to compile its contribution to the LED review, individual DPA replies should be submitted by 15 October 2025 eob.

Please note that your replies may be made public or may be disclosed in response to access to documents requests in accordance with Regulation (EC) No 1049/2001.

When there are several DPAs in your Member State, please provide a consolidated reply at national level.

When replying, please take into account that the questions below concern the period from January 2022 to 31 August 2025.

Following the input from other stakeholders, it is not excluded that the Commission might have additional questions at a later stage.

Deadline of submissions of the answers to the questions by DPAs: **15 October 2025 eob.**
